How do I create a list of items ordered by specific staff members?

Last updated: Wed, 08 Sep 2021 17:09:23 GMT

Applies to

- Wise configuration

Answer

This information can be gathered by running the following query in the Manager at systemWise > Reports > Report processor, on the Queries tab:

```sql
select *
from bestel_verzoek where
userid = '[actor ID]'
limit 999;
```

If you need to find titles associated with those items:

```sql
select *
from bestel_aanbod where
aanbod_id in
(select aanbod_id from bestel_verzoek where userid = '[actor ID]')
```
