I cannot make changes to an entry in a system table.

Last updated: Wed, 08 Sep 2021 17:36:46 GMT

Symptom

• You are in a system table entry and cannot click the Change radio button

Applies to

• Wise configuration

Resolution

1. Ensure that you have appropriate permissions for making these changes.

2. The table may have an Instantie (Institution) tab and a Systeem (System) tab. In most cases, all configuration is done on the System tab for single-tenant systems. Sometimes there is also a Branch tab. When on any tab other than System, if you see the letter ‘S’ in the Branch column, that means that the system-level settings are in effect. As a result, you need to click on the System tab to make any changes. Those changes will trickle down to the Institution level.
