The HTML code "<br>" appears explicitly in my message texts

Last updated: Wed, 08 Sep 2021 14:52:58 GMT

Symptom

• Instead of resolving into its effects, "<br>" appears verbatim in the public interface

Applies to

• Item request manager
• Wise configuration

Resolution

"<br>" must be formatted a bit differently in the message text to display correctly. A double line break (<br><br>) can be replaced with @@ BR @@
